

# About Us

Global Cans is a one-stop solution for all your's metal packaging needs. We are great believers in the vast potential of metal and have, time and again executed the most challenging projects to prove the versatility of tin packaging. With an extensive scope of utility across various industries, containers manufactured at Global Cans are employed for packaging diverse objects and items. Global Cans range today includes a variety of tin containers or Foods / Paints / Solvents / Seeds.

# Quality

Global Cans follow strict quality control measures at our manufacturing as well as testing facilities. International standard has given our product an edge in the market, meeting the fast changing demands and requirement of the clients.

The ISO 9001:2015 (QMS) certification is a proof of our commitment towards quality.

## Why Global Cans?

1. Creating quality products is our foremost priority; our operations are overseen by experts and our products are tested at every level before they reach the clients.
2. We hope to continually create products that are kind to the environment, helpful to society and supportive of sustainable development.
3. Rigidity and strength ensure protection of package and product in transit and storage.
4. Highest quality products.
5. Punctual delivery schedule.
6. Competitive price.
7. Innovation.
8. Perfection.

## Why Tin Container?

1. Versatility: Metal can be recycled into a completely different body. What is a can today might be a vehicle tomorrow.
2. Sustainability: As it can be re-used repeatedly, it's one of the greenest and most eco-friendly materials available to product manufacturers today.
2. Strength: Metal is sturdy, which is why it can protect its contents better in even the most hazardous conditions.
3. Hygienic: A metal package preserves its contents especially perishable products such as food, hygienically and for longer.
4. Durability: Metal packages have a much higher shelf life than other materials.
5. Recyclable: Metals are completely recyclable and can be reinvented in different products over and over again.
